

Beverage Insert

Step 1 - The foot-print of the Beverage Insert is slightly smaller than the footprint of the shelf (plastic or metal). Simply drop the beverage insert onto/into the shelf.

Step 2 - Based on the weight (liquid) when operating the fully loaded cart, we recommend to equip the beverage cart with ONLY four (4) shelves.

Step 3 - The height of the Beverage Insert protects beverage containers from falling off the shelves in transport. Soft “rubber-wings” adjust to the width of most beverage containers and keep taller bottles from tipping over and glass bottles from rattling when operating the cart.
