Gain Efficiency in Material Handling

Our Bin-Cart holds up to 10 bins. This cart allows retail stores with conveyors to realize the benefits and increased efficiencies of our Opti-Cart system. The 6" deep bins are large enough to accommodate any product category. The bins are able to nest and stack; when used upside down the top functions as a lockable lid. Dividers and separators are available as additional accessories that assist in keeping the products organized.

## Benefits:

- Improved back-room organization
- Reduced time and labor for shelf replenishment
- Decreased inventory levels through product mobility
- Adaptable to merchandise characteristics
- Bins simply slide on and are easy to access
- No tools required for assembly and disassembly
- Compact design for in-aisle maneuverability
- Tested and rated for 1,100 lb. stationary; 650 lb. in motion
- Molded plastic will not fade, dent or discolor

## Specifications
