Gain Efficiency in Material Handling

The 23"dc-**Cart** moves totes and bulky products safely while eliminating product damage; as well as significantly shortening your delivery time. The reusable cart was engineered to utilize the maximum foot-print available on a trailer.

Benefits:

- Rapid loading and unloading for bulk goods
- Maximum cube utilization on 99" wide trailer
- Straps or net secure load and prevent product damage
- Optional shelves separate product
- Reusable equipment: No disposal of pallets or shrink-wrap
- Can compress 5 to 1 to reduce storage/return footprint
- Different caster configurations available
- Compact design for front door delivery
- Tested and rated for 1,100 lb. stationary; 650 lb. in motion
- Black molded plastic will not fade, dent or discolor
